

In the Company of Champions

Mike McSpadden with Kid Trick, World Champion three-year-old Stallion

In July, Sales Manager Mike McSpadden's three-year-old stallion, Kid Trick, won his first world title. It all happened at the American Buckskin Registry Association World Show in Tulsa, Okla. He placed first with each of the four judges in the panel to be named world champion. This may have been muscle-bound Kid Trick's first world title, but this Fastrack horse has taken home numerous other awards this year, including seven grand and one reserve show placing. McSpaddens are now looking forward to the prestigious All American Quarter Horse Congress show in November.

A huge accomplishment! What's more, Mike has bred and raised these Fastrack® champions on his

own, without the help of professional breeders or trainers. When asked what makes these horses special, Michelle, Mike's wife, mentioned, "One thing I admire is the heart that Mike puts into his work with these horses. They are champions because he's given them the best." He takes the greatest care and only gives his horses the very best to ensure that they are healthy and performing their best. This means including Fastrack direct-fed microbials along with his perfected nutrition and management practices. Mike mentioned, "With Fastrack, we know our horses get the most out of their feed and we're ahead because we know they are getting better nutrition."

All horses at the McSpadden stable have been supplemented with Fastrack since their first steps. Microbial Pack and Fortifier® are added to the grain daily. "With our Fastrack program, we eliminate the general problems, colic, traveling stress, horses off feed and we don't have constant vet bills," Mike said. Equine Gel is used post-worming and when hauling. Mike continued, "When traveling to shows, our horses are aggressive eaters when they get off the trailer. With Fastrack, they don't go off feed which could be

problematic before a show." And, they know that Fastrack will complement their nutrition program to ensure their champions and all of their animals maintain a healthy digestive system. "We've used Fastrack for over 15 years, since it was first introduced. And we'll never stop using it," said Mike. After all, a healthy digestive system lends itself to a healthier immune system and an overall healthier animal.

McSpadden's Fastrack Program

Equine Gel:

- Mares when foaling
- Newborn foals
- Before and after hauling
- Before each show

Microbial Pack:

- On feed daily

Fortifier

- On feed daily
